1 Special management area placement

1.1 Policy

A Special Management Area is a designated area within a centre where inmates may be housed when an assessment of their individual needs/circumstances has found they are vulnerable or at risk from other inmates in the normal discipline area of the correctional centre.

Inmates held in this area associate freely with each other and have access to programs and services similar to inmates housed in normal discipline.

CSNSW has established multiple Special Management Area Placement (SMAP) options across the correctional centre network to manage inmates where the nature of their offence or previous employment status may put them at risk within the mainstream prison population.

The assessment and decision to place the inmate in a Special Management Area are made during the reception process (**refer to COPP section 1.1 Reception procedures**) or following receipt of a written application for protection from the inmate, or when staff become aware of a threat to the inmate.

Clause 33 (3b) of the *Crimes (Administration of Sentences) Regulation 2014* authorises the Commissioner to direct these inmates be housed separately as they would be at risk if not separated from other inmates.

A SMAP inmate must never be placed in a cell with any other inmate (other than another SMAP inmate who has been assessed as an appropriate cellmate). This includes clinic cells, camera cells and assessment cells.

An inmate in SMAP must have their status reviewed at least once every 12 months to establish if such placement is still justified. In addition, if the inmate faces any charges for incidents related to the good order and security of the SMAP area, a review of their status will immediately be undertaken.

A protective custody direction under section 11(2) of the *Crimes (Administration of Sentences) Act 1999* is **not** required to facilitate this placement.

The annexure *Assessment tool: Inmate under threat* is to be utilised to assist with identifying inmates at risk or under threat, and in determining their placement options (e.g. normal discipline; offender non-association alert; separation; SMAP; protective custody).

1.2 Review of cell placement decision

A review of an inmate's cell placement decision must be undertaken by the officer specified in the Local Operating Procedures (LOP) upon request for protective custody/SMAP. A new Health Problem Notification Form (HPNF) should be requested. Refer to *COPP section 5.2 Inmate accommodation*.

1.3 Procedure

	Procedure	Responsibility

Forward the application to the Functional Manager (FM) for endorsement.	Authorised officer
3.	Decide if application is supported and include additional comments if required. If supported, recommend a review date for the placement (no longer than 12 months).	FM

1.4 Objections and complaints about SMAP

An inmate can object or complain about any condition of their imprisonment, including their separation. Their reasons for objecting or complaining should be in writing and sent to the MOS or Governor.

The MOS or Governor must respond in writing within 14 days explaining how the complaint will be dealt with and the reasons for the decision. The FM must inform the inmate of the decision.

2 Transfer of SMAP inmates

2.1 Policy

When a SMAP inmate is transferred from one correctional centre to another, or to Police/Court cells, the Governor or an officer authorised by the governor must assess the potential risk to the inmate during the period they will be in transit.

3 SMAP cancellation notices

3.1 Policy

A SMAP must be rescinded if a protective custody direction has been issued under section 11 of the Crimes (Administration of Sentences) Act 1999 and the inmate is placed in a Protection Non Association Area (PRNA).

A SMAP may also be cancelled at any time by the Governor or FM if the risk to the inmate's safety has lessened. However, in consideration of the inmate's previous concerns for their personal safety, such actions should only be taken following consultation with the inmate, and where appropriate, with the inmate's concurrence.

An inmate may agree to this arrangement as part of a reintegration plan for placement in normal discipline or to effect a classification recommendation which would permit a reduction in their security classification and placement.
